

Short introduction on how to access the LoCloud experimental vocabulary application with a test account.

1) ACCESS POINT

The access point to the vocabulary application can be found at <http://vocabulary.locloud.eu/> (see figure 1).

My Vocabularies

If you want to establish your own vocabularies or import vocabularies so that they can be used during the LoCloud enrichment process you need to log in to the vocabulary application.

Please first request an account for the vocabulary application. Click here: [Request account!](#)

[Click on the enter button to go to the vocabulary tool!](#)

Figure 1 - LoCloud Vocabularies Website > My Vocabularies Page

2) YOUR ACCOUNT

Click on “ENTER”.

If you want to import or create own vocabularies please request an account via email to admin@ait.co.at

Then enter the vocabulary tool and choose “A new vocabulary”

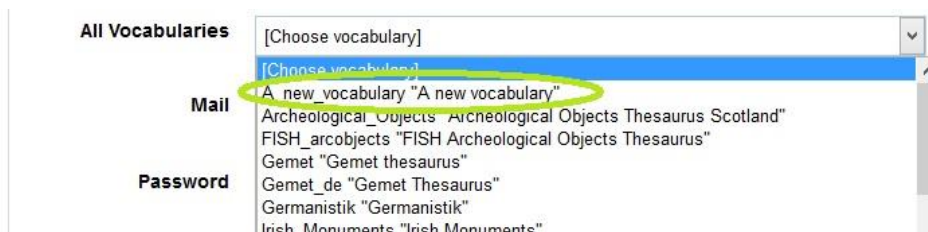

Figure 2 - Choose to create a new vocabulary

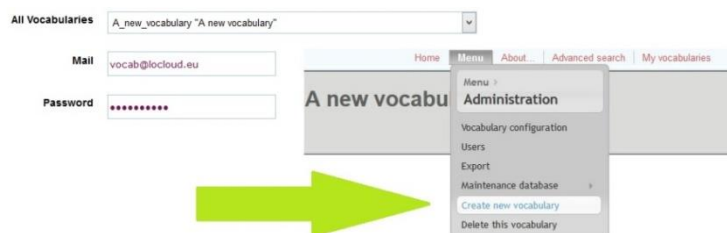

Figure 3 - After log in with your account you may create a new vocabulary

3) CREATE/IMPORT VOCABULARY

Then go to Menu > Administration > **Create new vocabulary**

The screenshot shows a web interface for creating a new vocabulary. At the top, there is a navigation bar with links for 'Home', 'Menu', 'About...', and 'Advanced search', along with a search box. Below this, the main heading is 'A new vocabulary'. The form contains a text input field labeled 'Vocabulary short name' and a button labeled 'Create & Continue'.

Figure 4 - Enter the vocabulary short name for the new vocabulary

- 4) Enter the vocabulary short name of your new vocabulary and go on with the administration details.
- 5) After you have created the online link of your vocabulary you could either import an existing vocabulary or create a vocabulary from the scratch.
Please refer to the [Vocabulary End User Documentation](#) for any further information on how to work with the vocabulary application.

6) USE YOUR VOCABULARY IN MORE

The LoCloud vocabulary application has two main functions:

It allows to **import and create** vocabularies and to **contribute** the vocabularies via webservice to the MORE aggregator.

If content providers want to use their vocabularies in MORE they need to acknowledge the URL of their vocabularies via email to admin@ait.co.at

The vocabularies will then be available also to all the other LoCloud partners using MORE.
